Craig Witte is the Vice President of Programs, Merrill Technologies Group in Saginaw, Michigan. He is responsible for the development of manufacturing solutions for core strategic customers, oversight of proposal operations, and end-to-end customer relationship management.

Mr. Witte has more than 25 years of defense industry experience with the last five years leading manufacturing teams at Merrill Technologies Group. He has held positions of progressive responsibility from Systems Engineering, Program Management, Business Development, and General Management. His experience includes satellite communication systems engineering, fiber optic systems and component development, airborne radar imaging, C4ISR systems, cybersecurity, remote weapon systems, and ground combat vehicle systems.

As General Manager, Mr. Witte integrated Merrill's aviation and defense product lines into a single high-performance company, oversee manufacturing operations, and develop a sustainable strategic business plan for continued growth. He developed and executed strategic business plans and capture strategies resulting in highly stable and diversified pipeline and led more than 90 personnel as a single P&L center, across three geographically distributed locations. Mr. Witte was promoted to corporate Vice President, Programs in 2015 to further drive results from strategic capture through successful program execution.

Craig is a 1990 graduate of Michigan Technological University with a Bachelor of Science in Electrical Engineering. He earned a Masters of Engineering in Electrical Engineering from Villanova University in 1993, a Master's Certificate in Project Management from George Washington University, and also holds a Project Management Professional (PMP) certification.
